

# AIM Academy

**AIM Academy** is our online virtual platform that offers training and content-rich resources at a click of a button.

We packaged our expertise in a system that will deliver to you an enhanced user experience through a library of interactive content, with videos, images, quizzes, workbooks, and other active learning elements.

## Instructions on how to...

- Set up your machine
- Operate your machine
- Optimize Parts Programming
- Gain efficiency with SmartEditor™

## Hands-on Training that Includes:

- Interactive Tasks
- Step-by-step instructions
- Quizzes to track your progress
- Video and Software Demonstrations
- SmartEditor™ Software Demonstrations
- Workbooks & Practice Activities on your own machine

## Boost Your Bending Department Productivity by Training

At a recent conference of wire forming companies, one issue was raised by nearly every member in attendance, "We are losing our operators quicker than we can train them." Others reported, "I can't take the production hit to dedicate someone to train new employees."

"Training of employees is one of the best investments a company can make but it doesn't have to be expensive anymore." Most employees want to do a good job. They want to make a positive difference. They want that feeling of doing something to the best of their ability. When they get that feeling at work, they enjoy coming back every day. Training can lead to a greater sense of self-worth, increase productivity and greater employee retention.

AIM recognized the need to offer continual training, but how could we make it cost-effective for our customers? What could we do to assist our customers in training new employees and strengthening the skills and knowledge of all their employees without incurring travel expenses, time away from work and lost productivity?

To do this, AIM developed a Learning Management System, (LMS): AIM Academy. An online learning tool that is available on-demand, 24/7 with secure log-ins, your team is given access to this innovative training platform. Your employees can access AIM's LMS training modules to receive instruction on how to set up and run your AIM Machine. Our training modules lead you through the most basic description of your AIM machine-like "What's a payoff" and "Wire Straightening Fundamentals," through "How to program wire forms" using AIM's SmartEditor® program. Employees learn at their own pace. What if they miss something or want to look at it again? No problem. It's ready when they are!

AIM Academy complements our on-site and technical support training and it is quickly being adopted to support our customers growing training requirements. Better trained employees can lead to greater productivity. Greater efficiency, Less waste, Greater profit.

## AIM Academy CAPABILITIES – ADVANTAGES and FEATURES

### LEARNER

Self-paced – at your own pace  
Replay capabilities  
Virtual – Online Learning  
Learning in increments: 30 – 60 minutes (or whatever time you have)  
Come back and pick up where you left off

Instructions on how to...

- Set up machine
- Run machine
- Run SmartEditor® software
- Program parts

Hands-on Training that Includes:

- Step-by-step instructions
- Video and Software Demonstrations
- SmartEditor® Software Demonstrations
- Interactive activities
- Quizzes to test knowledge
- Workbooks – practice activities on your machine

### COMPANY

Training in house  
Training for new or experienced employees  
Training when you need it (On-demand)  
No travel expenses  
Reduced downtime  
Increased productivity  
Secured Learner Log In  
Tracking and completion mechanism  
Access to AIM Library of resources 24/7

- Online training – AIM Machines
- Machine Manuals
- Maintenance Guides
- Technical Documents
